

and M5 East and possibly a motorway that extends to the north (to Parramatta Road, Anzac Bridge, Victoria Road and then even to M4).

I'm not sure that the development access road was proposed at the time of the rezoning. Is this a road off the Gertrude Street extension? If so, this would not have been included in the original rezoning and would need to be assessed on its own merits.

The only concurrence we gave in relation to vehicular access and treatments are those listed in the correspondence.

Thanks for these. It appears from Chris Ford's letter to SHFA (dated ?) RTA has agreed to right turn access in/out of Marsh Street at Marsh Street/Gertrude Street (Extension) intersection. Its not clear whether RTA has agreed to right turns out of the development access road at this intersection. Could you clarify please?

Regards
Mal
